🍳 Cooking

PROJECT

REACT-EOMMERCE

Created complete ecommerce website with admin panel using reactJS and redux.

- Used firebase to authenticate user with google and additional feature of admin panel is visible if login as admin only.
- Firebase is also utilized for CRUD operations in admin panel and to fetch products in website.
- Functionality of add and remove items in cart and wishlist is implemented using redux.
- Pagination, sorting and filtering is implemented with custom functions.

Tech Stack: ReactJS | Redux | Chakra UI | Firebase

ZOOMCAR CLONE

Created a clone of a car booking website ZoomCar with complete workflow from selecting user's location, date and time to selecting cars and checkout.

Features:-

- Login and Signup interface for creating account and login user.
- Home page with a navbar using advance javascript also created calender for selecting dates using vanilla javascript.
- Used geolocation and geomapping api to select location.
- Created functionality to sort and filter cars. Also created functionality to apply coupon and dynamically change total including other fixed charges during checkout .

Tech Stack: HTML5 | CSS3 | Advance Javascript

ANTHROPOLOGIE CLONE

Created a responsive clothing e-commerce website for buying clothes, shoes & home furniture with frontend integration.
